

Fear Me

Owen Knight

You said, "One day I'll leave you"
But I knew you would not
You were my most faithful soldier
At least that's what I thought

Now I know what you think
That I'm a zealot on the brink
You said "Farewell"
Leaving me to dwell
In this fiery, infuriating hell

There's something igniting
Now that you're not around
Something inside me wanting to
Tear you down

I want you to feel pain
I will not restrain
What you love won't be saved
They'll all be in graves

You'll hurt
The way I am hurting now

I am facing battles
That I've never felt before
I need support
But you're not here anymore

I am leading a war
And I know what's in store
But there's something new there
For the first time I'm scared

But I will not let it show
All that you will ever know is

I will make you fear me instead
I have just begun but this is your end
There is nothing left to amend
We are enemies, no longer friends

I will make you fear me instead
You abandoned me, left me a wreck
You gave up your chance to repent
We are enemies, no longer friends

You say I'm the villain
But I've been nothing but kind
I never meant to harm you
But you're the one who lied

Your acts of betrayal
Will not lead me to fail
Resist or obey
You won't get in my way

You will cower to my might
This is war! Prepare to fight!

I will make you fear me instead
I have just begun, this is your end
There is nothing left to amend
We are enemies, no longer friends

I will make you fear me instead
You abandoned me, left me a wreck
You gave up your chance to repent
We are enemies, no longer friends

You know nothing of my agony
What I have sacrificed
All to help you and me

But now all these years have
Become obsolete
We will never be the same
You brought out the worst in me
The very, very worst of me

I will make you fear me instead
We are enemies, no longer friends
I don't want you (I will make you fear me instead)
I don't need you (We are enemies, no longer friends)

No longer (I will make you fear me instead)
No longer (We are enemies, no longer friends)
No longer (I will make you fear me instead)
No no no, no no no (We are enemies, no longer friends)

I will make you fear me instead
I have just begun but this is your end
There is nothing left to amend
We are enemies, no longer friends

I will make you fear me instead

You abandoned me, left me a wreck
This is what you get, I hope you're content
We are enemies, no longer friends

No longer friends
I will make you fear me instead
I will make you fear me instead
We are enemies, I'm not your friend
